

Real solution for SMR market

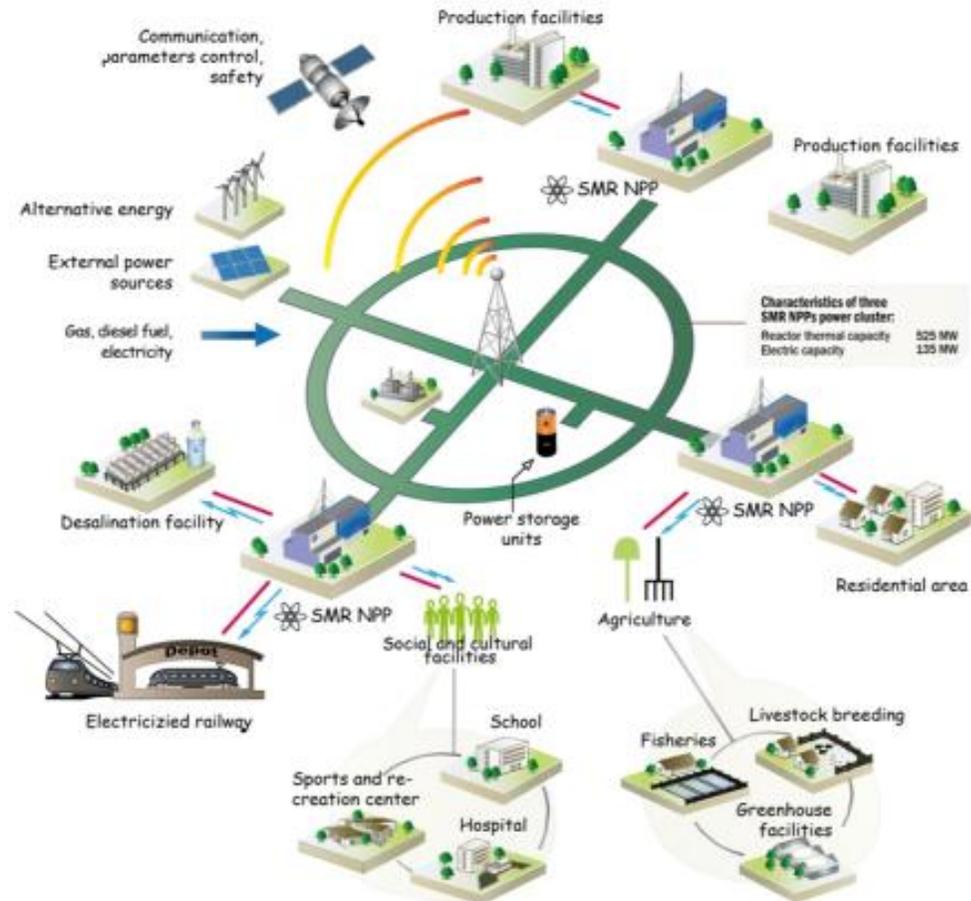

SMRs of Russian design are based on time and safe operation proven reactors of PWR type

Energy cluster of territory development on the basis of SMR and the Smart Grid technology

ADVANTAGES

- Reliability, sustainability of the grid;
- Quality of energy supply;
- Availability for new consumers and generation sources;
- Synchronous work of generation sources and energy storage and consumption points;
- Reduction of environmental influence;
- Improvement of life quality and territory development perspectives

*Information is given for cluster on the basis of 5 SMR RITM-200
